

* UNIT- 1 *

- (1) Introduction to PHP
- (2) Types of Errors
- (3) Declaration
 - (a) Variables
 - (b) Constants
 - (c) Output Statements
 - (d) Error Reporting
 - (e) Types of Variables
- (4) Arrays
 - (a) Implicit Arrays
 - (b) Multi-dimensional Arrays
 - (c) Associative Arrays
 - (d) Manipulation Functions
- (5) Strings
 - (a) Declaration
 - (b) Manipulation Functions
- (6) Functions & Control Structures
- (7) Reading Data from GUI Elements
- (8) Handling File Uploads
- (9) Interaction with Database

(10) Sessions

(11) Cookies

(a) Persistent Cookies

(b) Temporary Cookies

(12) Listing of Directories

PHP

①

PHP $\left\{ \begin{array}{l} \text{Personal home Page} \\ \text{Hyper-Text Preprocessor} \end{array} \right.$

It is a server-side scripting language to develop the dynamic web Application

PHP \rightarrow C + Perl \rightarrow developed by Rasmus
PHP 1.0 \rightarrow not server side

② Versions:-

(a) 1.0 $\left\{ \begin{array}{l} \text{1995} \\ \text{handle server side Request, but} \\ \text{not server side scripting language} \\ \text{C + Perl} \end{array} \right.$

(b) $\begin{array}{c} \text{1997, November} \\ \uparrow \\ \text{many pre-defined} \boxed{2.0} \rightarrow \text{server side scripting} \\ \text{functions} \\ \downarrow \\ \text{supports different} \\ \text{database servers} \end{array}$
